

Make your communication easier and the working environment safer

BT Audio Visual Alerting Solutions

Make your daily communication easier

We provide comprehensive solutions for voice-paging systems, telephone alerting, safety, security and emergency notification.

Efficiency

Our audiovisual alerting solutions help to increase staff efficiency and improve safety in a range of environments.

Visual alerts

The LED strobe light allows handset rings to be represented visually in a noisy/quiet environment making it an ideal solution for high-risk areas.

Audio alerts

The Audio Alerter allows handset rings to be amplified or provide voice paging, helping increase staff efficiency.

One-stop solution

We offer a one-stop solution that includes site survey, the supply of hardware and installation.

Maintenance

Three and five year maintenance options are available.

What can we offer you

The products support premise-based IP or Analogue connectivity across all BT telephone systems.

LED Strobe Light

The Analogue and IP strobe light is designed for alerting and notification of telephone, emergency, safety and security events, particularly in noisy and noise-sensitive environments. The strobe is LED and offers 5 configurable flash patterns/intensities, and four colour options to suit any application requirement.

Our strobe light offers a simple visual solution and each design comprises of 8 highly efficient and powerful LEDs that cast light 360 degrees horizontally and 180 degrees vertically, with each LED capable of 643 Lumens and brightness of 199 Candela.

Audio Alerter

The Analogue and IP audio alerter is a versatile unit that connects to a PBX via an analogue extension or SIP endpoint and allows you to set the unit to make either a paging announcement from any handset on the telephone system or an extension loud ringer for use in a noisy environment where the standard handset ring is not audible.

When set to loud ringer mode, the units are programmed to ring in association with an assigned telephone extension.

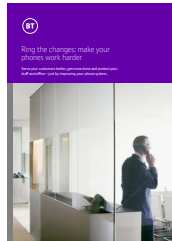

When using the SIP version of this solution, you are able to use one of the standard ringing tones installed in the unit or upload your own as required to allow bespoke rings/sounds to be associated with your individual extension.

Looking for more? Add something extra

There are more ways to make your BT telephone system go the extra mile.

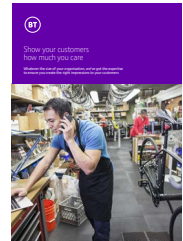

Ring the changes: make your phones work harder

Nowadays, a telephone system is about more than just making and taking calls. It helps your staff get more done. It helps you talk to your customers better. We offer a range of add-ons including voice recording, music on hold and personalised greetings, and even linking your locks to your phone.

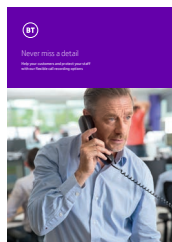

Show your customers how much you care

Making customers feel welcome is important, so greeting them with clear, professional messages and informing or entertaining them using music or messages are proven ways to deliver higher rates of customer satisfaction.

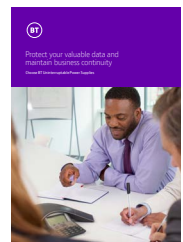

Never miss a detail

Call recording is a great way to improve your business, whatever its size. And we can help find the perfect choice for you. Whether you want to record calls locally on your PC. Or catalogue thousands of hours of audio in a searchable, secure place.

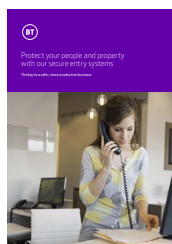

Improve your data security and business continuity

Uninterruptible Power Supplies (UPS) are a great way of protecting both your valuable data, key equipment functionality and ensure you maintain business continuity in the event of a power failure or power issue.

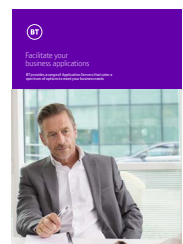

Securing your business starts at the door

Whatever business you're in, there are some things you can't compromise on. Keeping staff safe, protecting customer data, keeping expensive equipment in safe hands. Whatever matters most to you, our secure entry systems make it easy to protect it.

Facilitate your business applications

To provide you with a complete one stop solution, BT have introduced a range of Application Servers that cater a spectrum of options to meet your business needs.
